

# Thank you for ordering your style report!

---

Here are some instructions on the images I'd like from you in order to complete your personalized style report:

1. An image of your face head on.
2. A full-length image of your body at chest level in form-fitting clothing.
3. General photos--about 10 (up to 20) photos of yourself that you may already have in different lighting and different clothing (you can send less if you'd like, but I find I get the best accuracy when I have more photos).
4. Photos of you in daylight (preferably taken one after another in the same/similar spot with same lighting and similar angle) and with minimal make up (and preferably not too colorful of a background) draping the following four colors:
  - a. Royal blue (if you don't have this, you can substitute magenta or purple)
  - b. A cool gray (make sure that it's cool and not warm!)
  - c. Brown (can also be beige if you don't have brown)
  - d. Yellow (can be orange also, as long as it's bright)

About the number of photos-- I find my analysis is most accurate when I take a look at ~10 photos (in different colors and different styles). I know this may seem excessive, but with virtual analysis, I really like to make sure that I get an accurate representation through the photos (photos taken at different angles in different lighting help with that). You could send up to 20 photos if you'd like. 😊

About the color drapes—if you're not too interested in color analysis and are mostly interested in Kibbe, feel free to skip the color drapes. I can still give you a pretty reasonable guess as to what I think your season is if you provide a wide variety of colors that you're wearing from your general photos. But for the best precision, the draping photos will help!

If you'd like, you can also describe what your thought process is on your body type and color season—this would help me better gear the style report's explanations of my answers to what you may be thinking. But that's really up to you! We will also have a follow up email where you can ask me any questions about the report that you'd like.

Please also let me know if you have any questions about these instructions! I'm looking forward to receiving your photos and getting started on your analysis!

-Merriam Amani
